

Quadric IT Unveils AI-Powered Sustainable Innovations at Bio Asia 2025 in Hyderabad

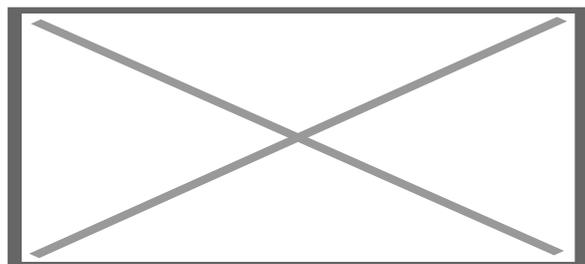

Description

Hyderabad: Quadric IT, a pioneer in AI-driven and sustainable technology solutions, is making waves at BioAsia with a lineup of groundbreaking innovations. Among these, the Reusable Smart AI-Based Notebook, co-invented by Suman Balabommu, Kesari Sabniveesu, and Raghu Ram Thatavarthy, is set to revolutionize the way we take notes while protecting the environment.

This AI-powered reusable notebook functions like a traditional notebook but offers 100 reuses per page. Handwritten content can be seamlessly converted into digital format using the RenoteAI app, which also enables cloud storage and AI-generated prompts for instant knowledge retrieval. Users can simply wipe the pages with a wet cloth or tissue to erase and reuse, dramatically reducing paper consumption.

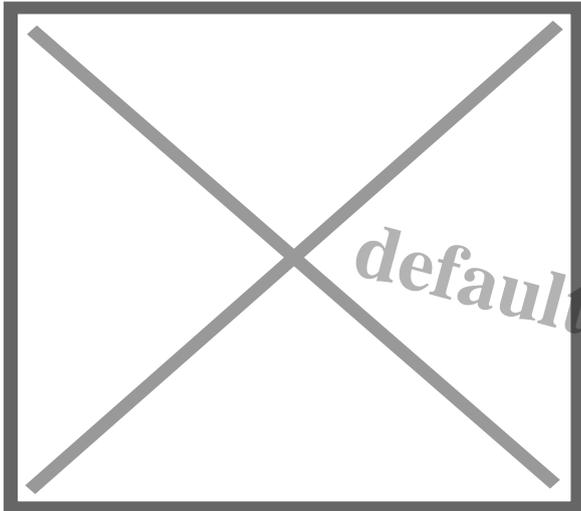

“The goal is to merge sustainability with AI-powered efficiency, ensuring that businesses and individuals alike can reduce waste while enhancing productivity,” said Kesari Sabniveesu, Co-Founder of Quadric IT.

Beyond the Reusable Smart Notebook, Quadric IT is presenting a range of AI and data-driven solutions tailored for Bio and Pharma industries. These innovations aim to streamline operations, enhance decision-making, and contribute to a greener future.

Quadric IT's innovations have garnered significant attention at BioAsia. TSRTC MD Mr. Sajjanar and Telangana Tourism MD Mr. Prakash Reddy garu visited the Quadric IT stall, appreciated the innovations, and requested their teams to evaluate their potential implementation in their respective departments. Furthermore, Honorable Central Minister Kishan Reddy has also shown interest in adopting these solutions within his ministry.

With a strong focus on AI, ERP, data tools, and sustainability, Quadric IT continues to push the boundaries of technological advancements. Its presence at BioAsia underscores the company's commitment to developing innovative solutions that benefit industries and the planet alike.
